Lenaar Digital is a trading name for Premier Lenaar Group UK Ltd headquartered in UK.

Our Vision

Lead in digital innovation that helps businesses grow and succeed in new ways.

Our goal is build a business that earn profits while accomplishing some social good.

Our Mission

Help businesses transform and innovate with flexibility

Navigate complex digital initiatives with confidence, and expand with the flexibility your business needs.

Our Solutions

01 **In-House Development Excellence**

- **Customized Solutions:** Our in-house development team creates bespoke software solutions that are precisely aligned with your business needs, ensuring scalability, security, and efficiency.

- **End-to-End Support:** From concept to deployment and ongoing optimization, our team delivers top-tier service with a hands-on, collaborative approach.

02 **Off-shore Development**

- **Access to Top Talent:** We provide resource hiring services, connecting you with skilled developers, engineers, and tech experts who integrate seamlessly into your team.

- **Flexible Engagement:** Whether for short-term projects or long-term collaborations, we offer flexible hiring options to meet your evolving business requirements.

Our Diverse Expert Team

Software Development

We have a diverse pool of expert Software Engineers with their hands experienced with MERN Stack, Flutter, Python, GoLang etc; designing state of the art WebApps, Mobile & Desktop Software Solutions

AR & VR and Game Development

It's Unity 3D, Blender or Unreal Engine? We have a dedicated team to design your environments and bring your play into digital action to catch new heights of AR/VR or just 3D Gaming

Big Data & Analytics

DATA IS A BIG MESS

To deal with huge pool of data, we have experts and (not boring) data engineers who are literally using every efficient tactic to pool in and stream data into pipelines, whether it's Hadoop, Apache or whatever

And on top of that we have creative data analysts and interesting data scientists to analyze useful insights and information out of the raw data.

LLM & AI-Ops

Today's in every small to big task, LLMs and Gen AI are involved. Literal thanks to OpenAI and open LLMs. But finetuning the model for your need is one piece of puzzle. The rest is to put that into motion of production; and for that we have experienced AI Engineers with DevOps expertise helping many SaaS Startups in our realm.

Cloud & DevOps

With more data hungry softwares and AI, it's important to have geeks of AWS & Azure Professionals who can actually put these things above our head; we mean Cloud!
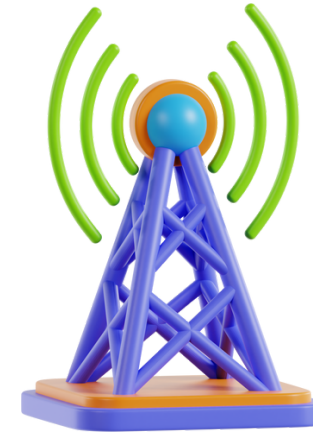

Industries Served

Creators & Media Productions

# Serving across Europe, North America, & Asia

Our Portfolio

A tool that super-edits Videos for you all using AI

For Transpify Co. Ltd in Seoul, we helped them build this amazing web application that can take all decisions and using AI it super edits the video following the trends.
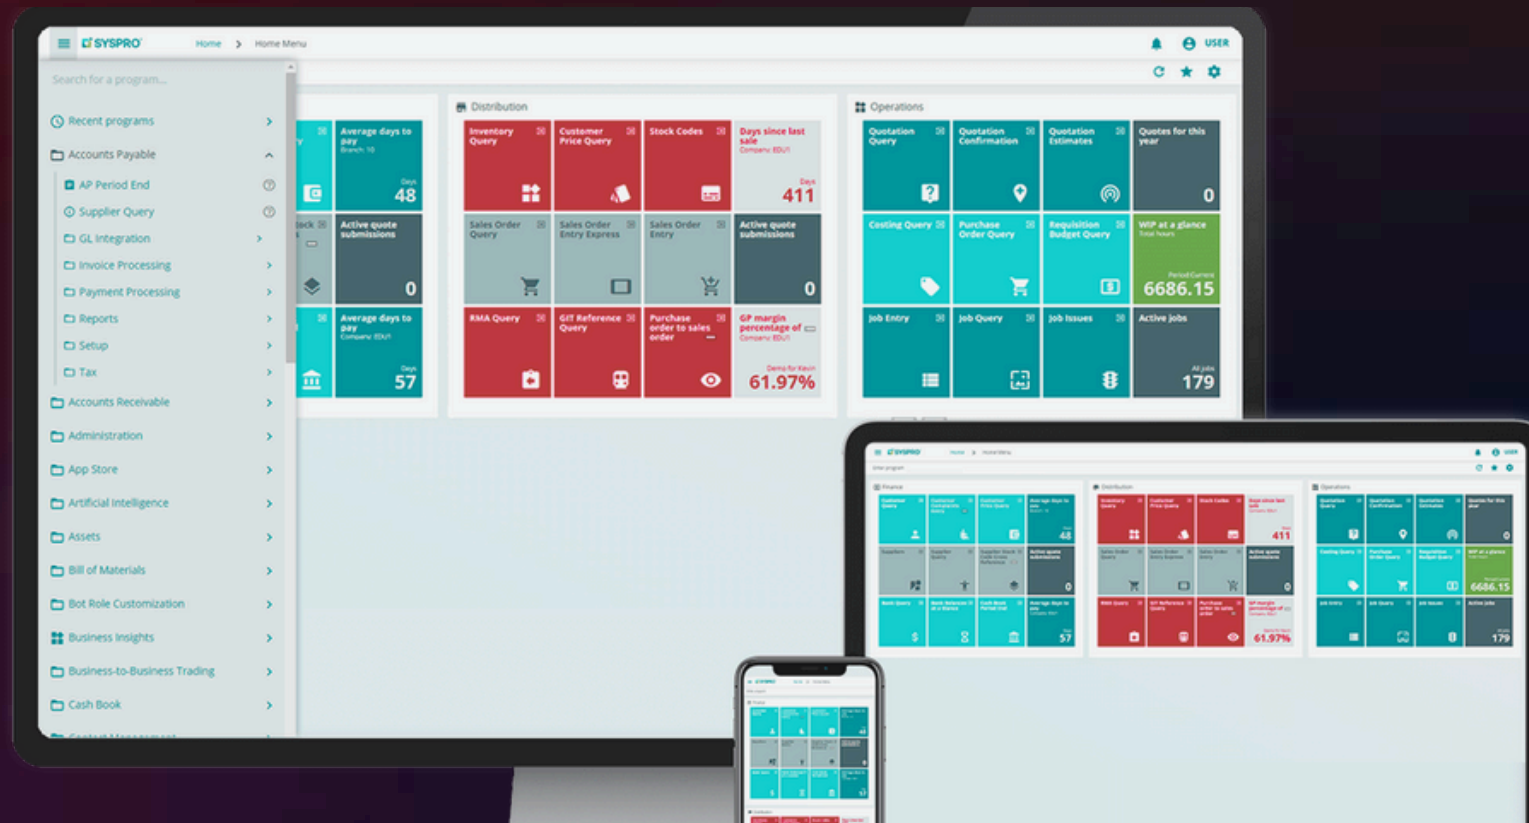

Our Portfolio

We developed an enterprise solution to automate all data streamlining jobs, handling the big data and and using AI it could predict many directions on the pattern of their utilities, expenses and export. This helped them improve the efficiency by 20X with more accuracy in system.

WAJAHAT&PARTNERS

Premier exporter of Timber in Malaysia

Our Portfolio

Real Estate ERP Solution

With our off-shore development model. Fortify built a cloud-based project management solution that leverages big data and AI to empower realtors. By analyzing vast amounts of property data, market trends, and customer behavior, Fortify provides predictive insights, automated workflows, and personalized recommendations.

This enables realtors to save time, reduce costs, and increase sales while making data-driven decisions that optimize their business strategies.

Our Portfolio

APRICOT

5G & Telecommunication Consultants in Florida

Enabled ApricotCS to make data-driven decisions, optimizing their network performance and enhancing their overall efficiency of consultancy services centered around 5G deployment strategies, network optimization, and AI-based communication solutions.
